Harbinger Systems, Pune	Software Test Engineer (Automation)	Apr 2014 - Dec 2015
Atos india pvt ltd , Pune	Software Engineer	June 2013 - Feb 2014
Seed Solutions , Pune	Software Engineer	July 2012 - Jan 2013

**ACADEMIC HISTORY**

## PROJECTS

### #0 Fleet-Ops

(Mar 2022- Present)

#### #0 Fleet Portal

(June 2021-Feb 2022)

(Client: Diesel Direct)

Diesel Direct Delivers High-Quality Fuel, Reliable Fuel Services directly to your job-site or truck fleet. We make it easy to track fuel management and fuel inventory with our innovative cloud-based fuel management technology.

- Responsible for automation framework development, enhancement, test case development and Process improvement.
- Working as an Individual contributor for Automation tasks like test estimations, test coverage and test execution, test case fixes etc.
- Responsible for Database validation and API validation integration with UI test cases.

#### #1 Advisor

(Sept 2019 - April 2021)

(Client : Disney-ESPN)

ESPN AdVisor gives Ad Sales superb management over their Selling Rotations, proposals, orders, and inventory. It's a single Ad Platform unifying all brands domestically, allowing the team to operate as one. It is the system where the list of all programs i.e. Proposal, Deals, Selling Rotations are created, stored and maintained.

- Participate in sprint planning, sprint backlogs, determine priorities, adjust the priorities, make a decision and act on it.
- Responsible for Process improvement, Code quality, code review, project enhancement and help team in troubleshooting and fixing issues.
- Responsible for web automation script preparation, framework enhancement and data creation with fetch api.

#### #2 Guest Account

(Oct 2017 - June 2019)

(Client : Royal Caribbean Cruises)

Royal Caribbean International is known for driving innovation at sea and has continuously redefined cruise vacationing. Guest account is a web as well as mobile application to check and manage guest bookings, offers, services offered by Royal Caribbean, Celebrity and Azamara cruises.

- Responsible for automation framework development, script preparation, enhancement and maintenance as well as data creation with API automation.
- Handled two members team with task allocation and monitoring and resolving their issues.
- Smoke and regression suite execution for every build and updating Jira dashboard with Zapi for reporting.
- Mobile automation, test case automation, Maintenance, fixing issues and release execution with Appium.

#### #3 OMS (Order Capture express)

(Dec 2015 - Aug 2017)

(Client : AT&T Enterprise )

AT&T provides voice, video, data, and Internet telecommunications and professional services to businesses, consumers, and government agencies. Order Management systems are complex systems that allow Existing as well as new customers to capture and process new orders, Modify existing orders, Process customer moves and changes, price quotes and orders, validate orders etc.

- Responsible for automation framework development, script preparation, enhancement and maintenance.
- Responsible for regression and functional testing by running Automation for each build/release.
- Functional testing done with SOAPUI Automation by creating and running suites/scripts as part of regression.
- Involved in test management, test estimation, test planning, test environment preparation for each release.

#### **#4 NetTrust, Aware Mobile , Live Trust (April 2014 - Dec 2015) (Client: TaaSera Inc.)**

TaaSera develops preemptive breach detection systems that help prevent data breaches, insider threats by detecting and analysing hidden behaviours. TaaSera believes in providing solutions to detect evidence of pending data breaches before data is lost or stolen.

- Responsible for Quality Assurance and Automation of all integrated and interdependent systems.
- Performing Integration, Functional and Regression testing by manual and automation testing.
- Preparing test environments and endpoints by deploying ESXi on a virtual machine with the help of vSphere virtualization tool.
- Smoke and regression of Mobile security app (Aware Mobile) and Application(Web and windows) by generating trace and malicious activities on endpoints.

#### **#5 Issuer Transaction Processing (IBO) (June 2013 - Feb 2014) (Client : Worldline)**

Issuer Transaction Processing (ITP) is web based solutions to manage and process credit card transactions at Issuer side. Out of two back offices, we were serving as Issuer back office (IBO) of WorldLine bank. Issuer Transaction processing is one of IBO services.

- Worked as java support engineer along with handling build and release tasks.
- Involved in Build and release post successful build validation and verification with different face of testing.
- Performed Integration testing, Regression testing and functional testing with help of SOAPUI and Selenium IDE tool.
